

TUTORIAL-6

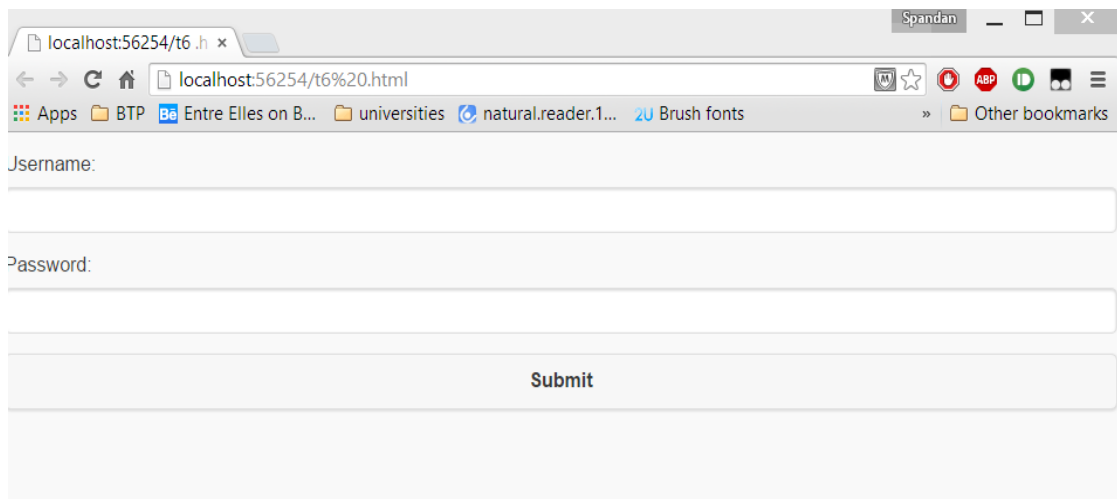

TASK:

To create log-in service as rest service and show log-in service URL in separate tab.

OUTPUT:

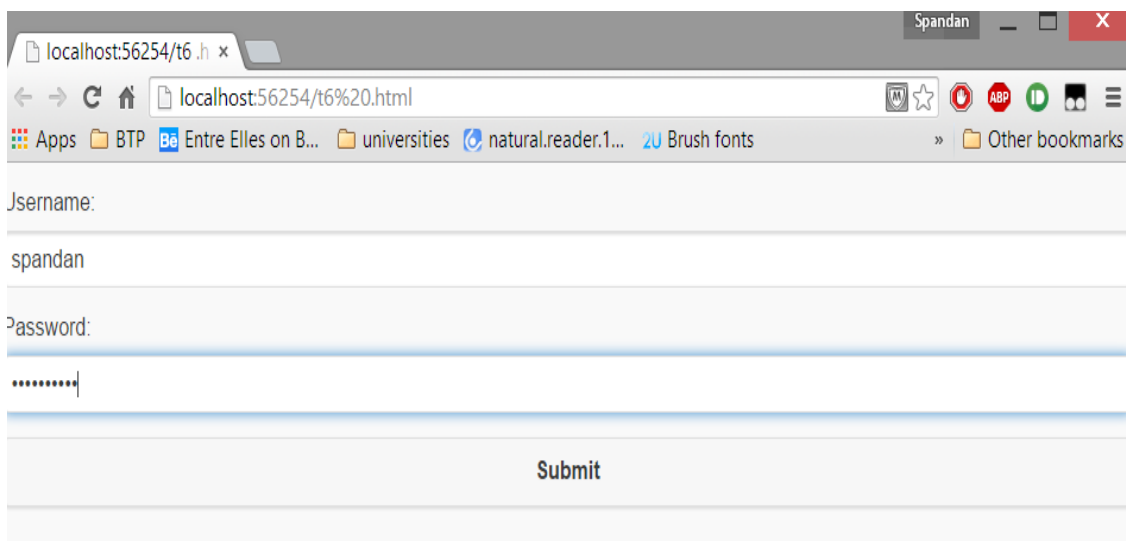

Log-in service is created. On click on submit log-in service returns WELCOME<username>

Output1:

A screenshot of a web browser window. The address bar shows 'localhost:56254/t6 .h' and the page title is 'localhost:56254/t6%20.html'. The browser has several tabs open, including 'Apps', 'BTP', 'Entre Elles on B...', 'universities', 'natural.reader.1...', and 'Brush fonts'. The login form consists of two input fields: 'Username:' and 'Password:'. Below the fields is a 'Submit' button.

Output2:

A screenshot of the same web browser window as in Output1. The 'Username:' field now contains the text 'spandan'. The 'Password:' field contains masked characters represented by dots. The 'Submit' button remains visible below the fields.

Output3:
